

TECHNOLOGY LIFECYCLE MANAGEMENT MADE EASY

94%

**CUSTOMER
SATISFACTION**

With a 94% customer satisfaction rating from Dun & Bradstreet in 2018, ITC2 becomes an extension of our clients' procurement and technology teams at no charge, and we remain carrier and data center agnostic to ensure they get the right solutions for their businesses.

Using our time-tested processes, ITC2 ensures that our clients have options when making long- or short-term connectivity decisions.

ITC2 Manages Carrier And Data Center Services Throughout The Full Lifecycle Of The Technology, So Clients Can Get Back To Running Their Businesses.

Initial Pricing

- We are up-to-date on industry pricing trends and practices, allowing us to drive the best possible quotes for technology needs.
- We partner with clients' procurement team(s) to manage RFPs, RFIs, RFQs, and/or consult on purchasing strategies.

Contract Consulting

- We provide contract services with our best-in-class legal team.

Service Delivery

- Our program management team bridges the carrier and client team(s) to ensure a successful installation.
- We have developed a proprietary process to support timely circuit delivery.
- We provide:
 - Inventory reporting
 - Financial reporting
 - Issue escalation and management

Invoice Audit And Review

- We provide initial invoice assessments to establish connectivity baselines that become the cornerstone of the client's technology strategy.
- We provide auditing services to ensure telecom billing compliance.

Support For Your Staff

- ITC2 is an extension of clients' procurement and IT/network operations teams, leveraging our industry knowledge and experience.
- Our management team has 20-35 years of experience in network hardware and architecture, as well as purchasing.

Helping Clients Increase Capacity While Optimizing Costs™
